MITRE PRO

Two Part Rapid setting Mitre & Trim Adhesive

Mitre-Pro is an instant, strong and permanent adhesive system. Formulated specifically for use with Wood and MDF & laminate it is particularly useful in the fitted furniture, shop fitting & picture framing trades & ideal for fixing cornice, light rail, gallery rail, as well as numerous other trims and components in many other industries.

Mitre-Pro is so strong that only two to three small drops of adhesive are needed for each application, it sets in 10 seconds, achieving an unusually thin glue line, without the necessity of clamping allowing the user to get on with the next job immediately. Mitre-Pro also bonds metals, plastics and rubber exceptionally well.

Subject to quantity, Mitre-Pro is available in various packaging formats. You can have the product boxed & completely unlabeled so you can apply your own brand label. Alternatively, we can apply your labels for you. We can supply with our Mitre-Pro label & overprint with your details. We can supply Loose, Boxed, in Blisterpacks or tubes. In fact, if you have a particular packaging requirement we would be happy to help.

With over three million units sold worldwide, Mitre-Pro is clearly the winner.
