KolorBond

Waterproof Worktop Joint Sealant

The Perfect Worktop Joint. It Bonds, It Seals, its Watertight.

Over 300 colours to match ALL the laminates

Kolor-Bond is specifically developed and formulated for sealing joints in kitchen worktops. Since 1994 it has undergone constant in house testing and is the only sealant of its type to have passed the rigorous testing procedure of F.I.R.A.

KolorBond is not only an excellent waterproof sealant it also contains excellent bonding and anti fungi agents, ensuring the strongest and the most hygienic worktop joint possible.

KolorBond is not too viscous to force the joint apart. Instead it's semi-gel formula seals the chipboard core against moisture ingress and at the same time provides a perfect colourmatch to the surface of the laminate, giving the appearance of an almost invisible joint. It will not run, and begins to dry after 10 -15 minutes so there's plenty of time to assemble the components without the fear of drying. After curing, the joint is completely impervious to attack from heat, direct sunlight, moisture and domestic chemicals.

Worktop joints should be machined with an accurate Topform mitre jig and a suitable router. Once the joint is formed; apply to both sides of the particle board core ensuring that they are completely covered. Tighten the connecting bolts until the joint is almost fully closed. Wipe off the excess sealant from the surface with a damp cloth. Ensure the laminate surfaces are perfectly level then fully tighten the connecting bolts, a small bead will squeeze out from the joint. Allow to dry for a few minutes and clean off with a damp cloth.

KolorBond is packaged as standard in a 70gms bottle which contains enough sealant for three 600mm worktop joints, stackable countertop display stands are provided, holding ten colours, each nine deep, complete with sign.

KolorBond is currently available in over 400 colours as standard. New colours are being added to the collection on a monthly basis. Special colours can be mixed upon receipt of sample for as few as 80 bottles.

Subject to quantity & certain conditions, kolorbond joint sealants are available in your own brand printed bottles or other custom packaging as required.

- Available in over 400 colours
- Rigorously tested by F.I.R.A.
- Exactly matches the laminate surface.
- Provides an excellent waterproof seal of excellent strength.
- Solvent Free.
- Impervious to domestic chemicals & detergents once dried.
- Anti fungi agents ensure the most hygienic joint.
- Cleans off with a damp cloth.
- 20 minutes assembly time.
- Also suitable for for repairing small chips & scratches in laminates.

Custom packaging & own brand.

Apply a liberal amount of Kolor-Bond to both sides of the joint to be sealed and bring surfaces together

Wipe off excess with a spatula and damp cloth

**There it is!
It's glued,
it's watertight,
it's almost
invisible
and that's
guaranteed.**
